A close-up, high-angle photograph of a hand drawing a spiral pattern in the sand. The hand is positioned in the upper left, with the index finger extended and tracing the curve of the spiral. The sand is a light, warm tone, and the spiral is a series of concentric, slightly irregular loops that expand outwards from the center. The lighting is soft, creating gentle shadows that emphasize the texture of the sand and the movement of the hand. The overall mood is contemplative and creative.

Indigenous Perspectives on Learning and Engagement

Learning Objectives:

1. Develop greater awareness of **Indigenous perspectives** on relationships, time, place, and our role in the natural environment.
2. Learn how the **Indigenous cultural and educational practices** can help us develop and improve collaborative, evidence-based, and physically and culturally contextual design processes and outcomes.
3. Learn how to use specific **tools and activities** to incorporate Indigenous perspectives and practices into the planning and design of learning environments.
4. Learn how we can design and build learning environments to support **best learning practices outdoors** - in addition to or instead of the now-traditional indoor environments.

Goals:

Two-eyed seeing: Indigenous & Western

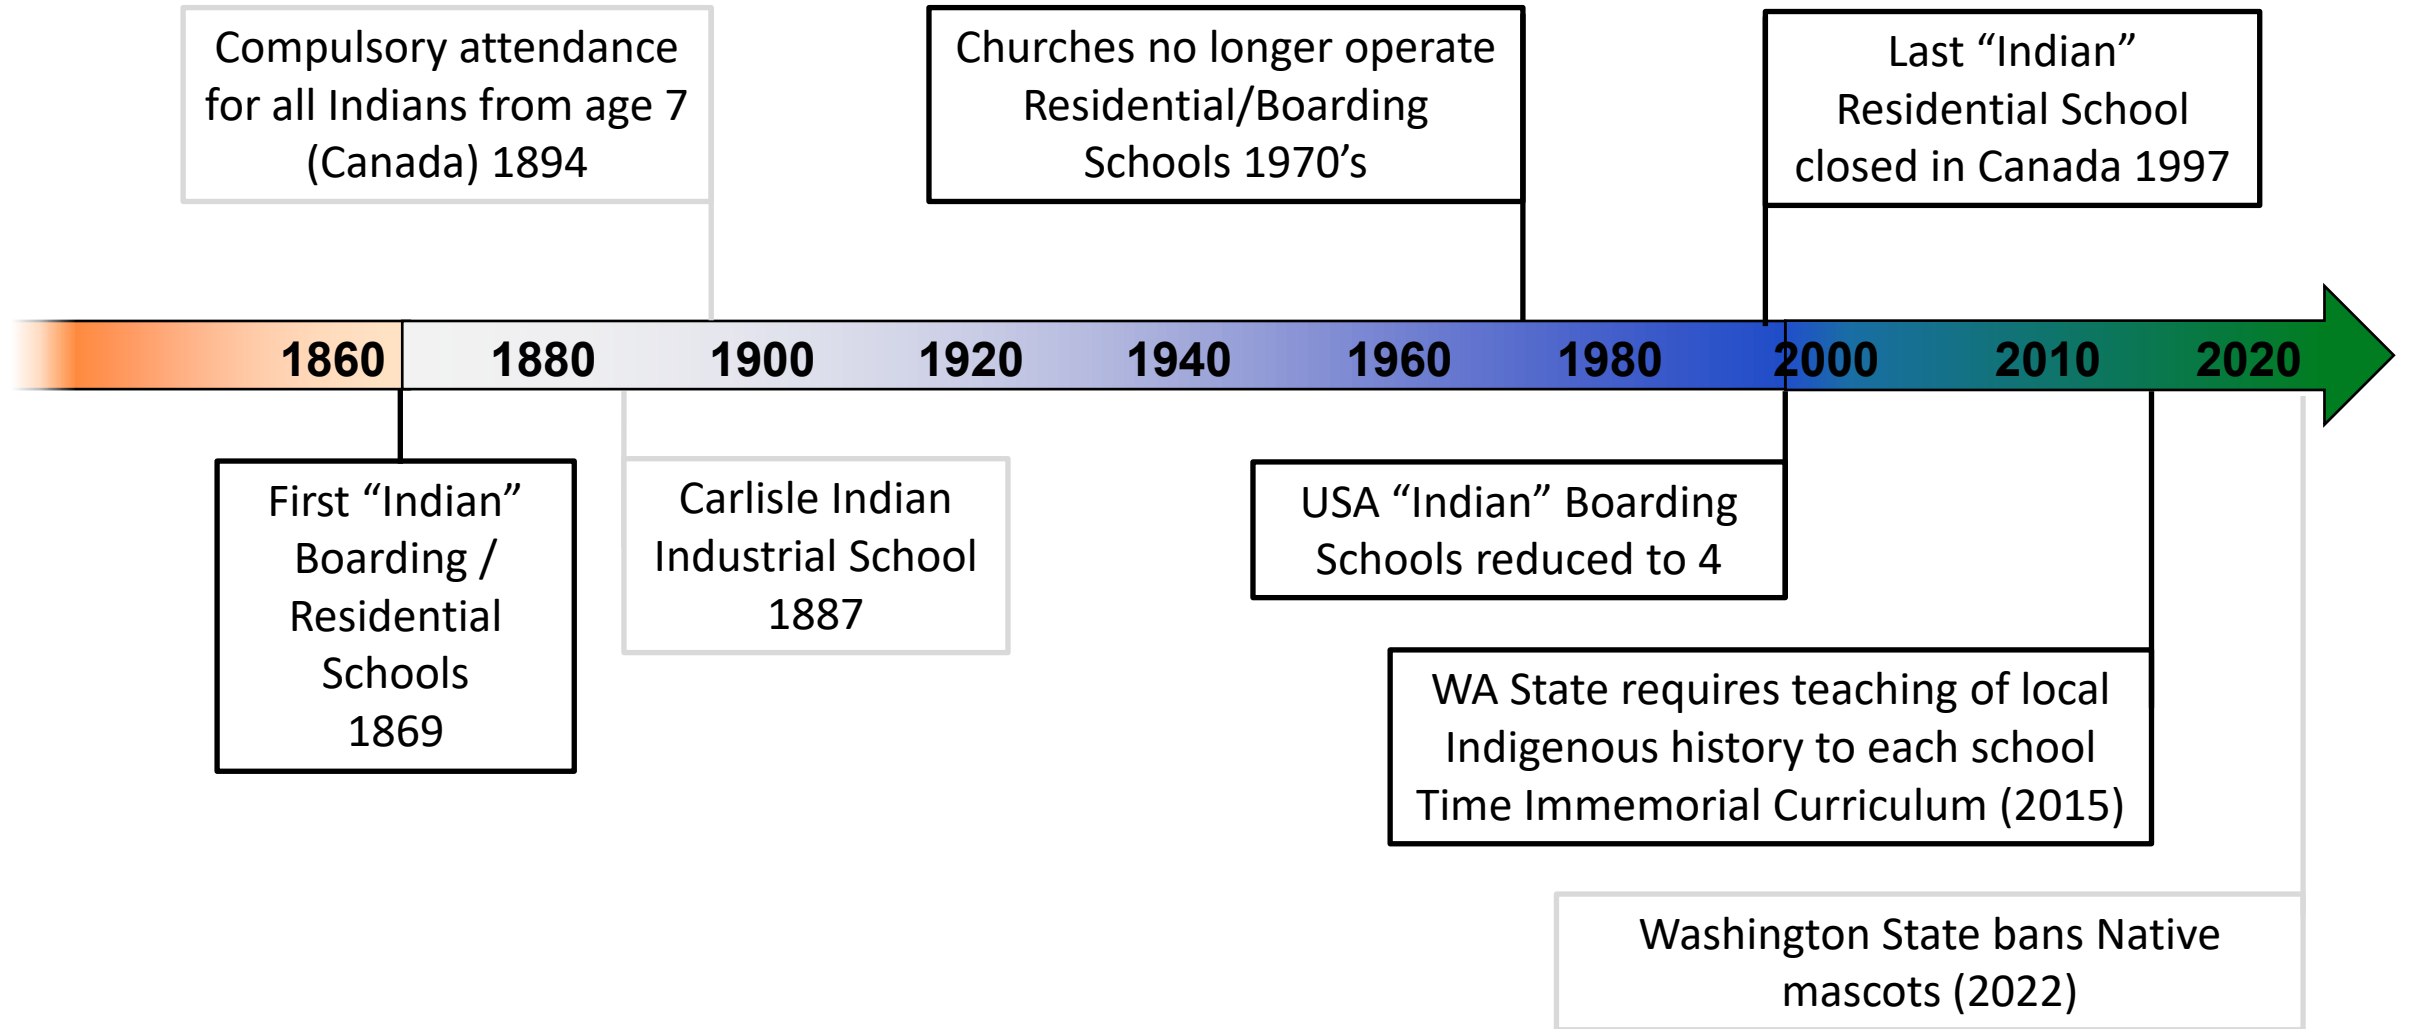

The right questions: Listen

Engage: Stakeholders through new perspectives.

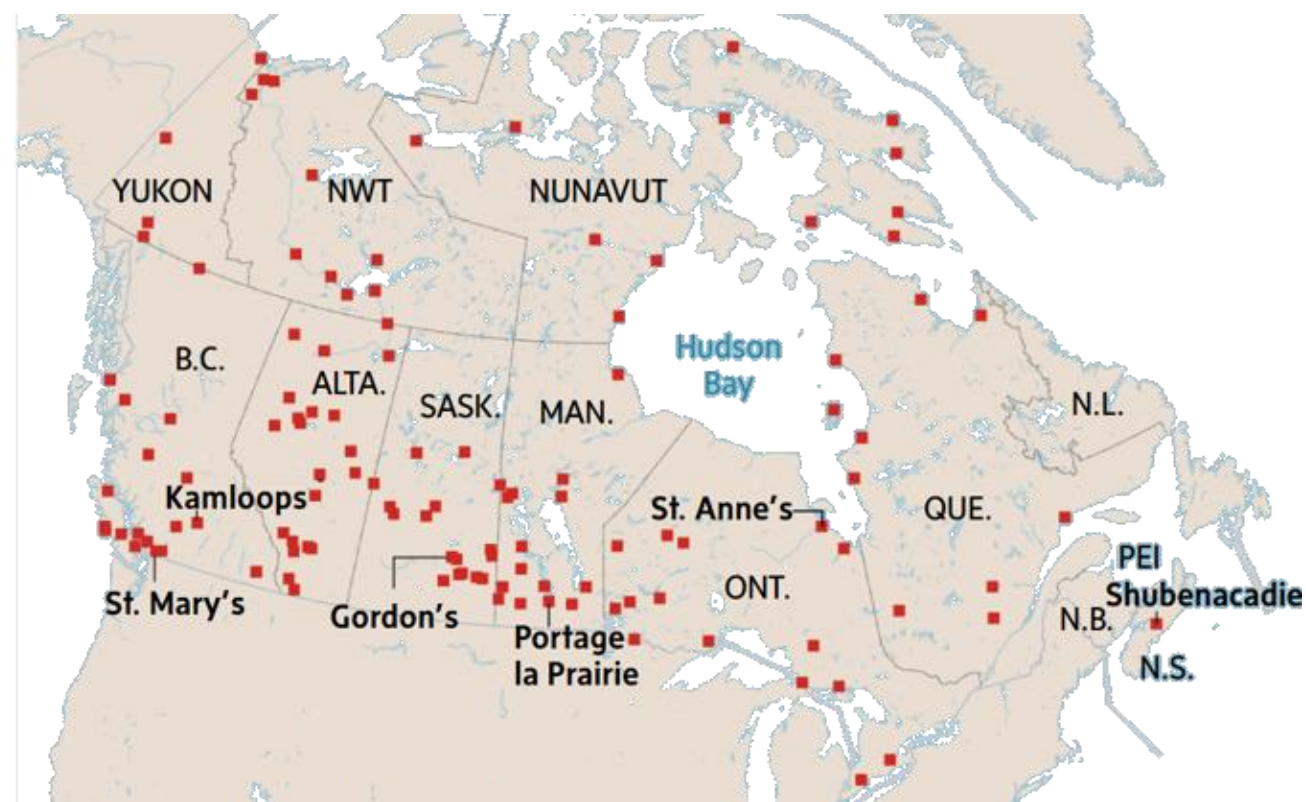

Local Indigenous Communities

Indigenous consultants, designers, builders and artists
– effectively and with authenticity.

Two-Eyed Seeing

‘the gift of multiple perspectives’

to learning to see from one eye with the *strengths* of Indigenous knowledges and ways of knowing, and from the other eye with the *strengths* of Western knowledges and ways of knowing, and to using both these eyes together, for the benefit of all.

Elder Albert Marshal (Moose Clan of the Mi'kmaw Nation, Eskasoni First Nation)
